

On October 15, Mr. Luo Yamin, Chief of Xi'an Environmental Protection Bureau and more than 60 officials from 13 regional and county level environmental protection bureaus visited the Lantian plant.

Mr. Tian Zhenjun, General Manager of West China Cement's Lantian plant presented an introduction to the Company's efforts in environmental protection and other input and investment from design and construction to commencement of production. The officials also visited the production line, waste heat power station, sewage disposal system and other environmental protection facilities. Mr. Luo praised the Company's commitment to environmental protection after his visit at the plant.
