

WCC Was Awarded as “Model Enterprise on Low Carbon Emission and Environment Protection”

On 29 March, China’s building material low carbon emission and environment protection responsibility declaration meeting and the March 15 2012 building material achievement report meeting was held in Beijing by China Building Materials News and China Building Materials Test & Certification Center. Officials from Committee of Population Resources and Environment of CPPCC, China Building Materials Federation, Certification and Accreditation Administration of PRC, etc. attended the meeting. WCC was invited to the meeting and awarded as “Model Enterprise on Low Carbon Emission and Environment Protection”.

CEO of WCC Mr. Tian Zhenjun attended the meeting (L:3)

Model Enterprise on Low Carbon Emission and Environment Protection

The award represents the fully recognition to WCC's efforts on low carbon emission and environment protection from the society. WCC will continue to apply advanced technology on energy conservation and emission reduction to promote the development of China's building materials industry and further implement social responsibilities.
