

WCC was Invited to Attend 2018 Silk Road Industry International Exposition

On 16th March 2018, the 2018 Silk Road Industry International Exposition of material and equipment of energy industry opening successfully held in Xi'an, WCC as the only invited oil well cement supplier, has displayed its oil well cement (Degree A and C), sulphate resistant cement and other special cements.

The theme of the exposition is New Energy, New Material and New Equipments -- build a community of whole life cycle in the energy industry. The exposition invited Petro China Changqing Oilfield Company, Shaanxi Blower (Group) Co., Ltd., China Railway First Group Co., Ltd., and other more than 500 domestic key energy enterprise, well-known research institutions, technical institutions to attend the exposition. The discussion of exposition centered on carrying out of communication and cooperation on the development of materials and equipment in the energy industry and also deeply discussed how to achieve safer and more convenient procurement and supply to reduce cost of circulation. As an indispensable material in cementing operation of petroleum, the oil well cement is highly concerned by the leaders, participating enterprises and the media of society. At present, the good fluidity, stability, cement thickening time and other product advantages of WCC oil well cement has established a good brand in the Oil and Gas enterprises. leaders from Shaanxi Yanchang Petroleum (Group) Co., Ltd. highly praised WCC's production capacity, performance and technical aspects, and he also encourage WCC continue to provide high efficient and high quality material support to the energy industry.

After the exhibition, WCC reached a cooperation intention with Shaanxi Yanchang Petroleum (Group) Co., Ltd., and signed memorandum of intent on the *2018 Silk Road Energy exposition*.

WCC will take every opportunity in energy equipment industry; implement the national "One Belt and One Road" strategic goal and the construction of core areas; promote the transformation and development of the energy industry in the new age and strengthen cooperation with Oil and Gas enterprises, so as to provide high efficient & quality material support to energy industry transformation and upgrading.
