

West China Cement Limited officially released its 2020 annual result

Recently, West China Cement Limited (“WCC”) officially released its 2020 annual result. The announcement pointed out that under the influence of the COVID-19 epidemic and other unfavorable factors, WCC actively coordinated epidemic prevention and control as well as production and operation. WCC has been continuously optimized, and various businesses have grown steadily. It has further promoted its internationalization strategy and achieved the "13th Five-Year Plan". "The plan has come to a successful conclusion. At the same time, WCC continues to improve the level of green development and intelligent manufacturing, bravely assumes social responsibility, and actively contributes to education, public welfare, and poverty alleviation, and has won high praise from both inside and outside the industry.

Looking forward to the future, WCC stated that it will further implement the requirements for high-quality development, continuously improve the development capacity of the main cement business in the service of the national strategy, build support for intelligent manufacturing in the information transformation, and strive to create more value for customers and shareholders.
