

Enormous Potential of Cement Industry with Encouragement on M&A

With the recent growing of cement price, the quarterly profit of cement companies is increased greatly and the stock price is also rising continuously. During The Eleventh – Five Period, China made remarkable achievements on structural readjustment, energy conservation and emission reduction, equipment upgrading, technical innovation and quality benefit. During The Twelfth – Five Period, China will further emphasize the quality and efficiency, environment and ecology as well as scientific development of cement industry by focusing on the following aspects:

Firstly, promote harmless cement kiln and finally assist in disposal of waste;

Secondly, accelerate industry transition and innovation;

Thirdly, optimize industrial structures and improve industry concentration;

Finally, develop new materials industry. (Source: Digital Cement)
