

The National Expressway planned in Shaanxi Province increased by 1,900km

On 8 July, it's informed by Shaanxi Provincial Development and Reform Commission that the national expressway planned in Shaanxi province increased from 3,600km to 5,500km, with four new main lines (Fugu-Yulin-Yanchuan-Weinan-Lantian expressway, Longxian-Baoji-Hanzhong expressway, Heyang-Tongchuan-Fengxiang expressway, Ankang-Pingli-Zhenping expressway) and four new specific lines (Xi'an-North Xianyang loop line, Xianyang-xunyi expressway, Ankang-Langao expressway, Yan'an-Yanchuan expressway). In the meantime, Shaanxi national highway also increased from 3,900km to 9,500km, with 17 highways increased.

It's noted that Shaanxi province will speed up the construction progresses and preparation works of these expressways and highways.

Moreover, it is reported that the feasibility study report of Ankang airport was approved by the National Government. The area of the new terminal building is about 5,500 m², which can satisfy the capacity demand of 300,000 people annually.
