

NDRC: PC32.5 “low-grade” cement standard will be eliminated recently

Department Chief of Industry coordination Department of National Development and Reform Commission (“NDRC) Liu Ming said on China International Cement Conference held on April 27 that PC32.5 “low-grade” cement standard is expected to be eliminated recently. The new standard will improve the quality of cement and other related products as well as market supply and demand structure. With the upgrading of consumption and industry structure, the measure will also accelerate the elimination of backward enterprise with poor quality products by industry upgrading.
